

OBJECTS WITHIN SIGHT DISTANCE TRIANGLE

NOTE:

1. The Transportation Engineering Design Standards define additional areas in which sight distance triangle criteria apply.
2. Items within the sight triangle must be lower than 24" or above 7'. The height is measured from the top of curb.
3. Safety devices such as fire hydrants and traffic signals may be located within the sight distance triangle with approval of the City Traffic Engineer.
4. Distance dependent on street classification. See section 6.9.
